SUMMARY

Computer Science graduate with strong analytical and problem-solving skills. Familiar with data handling, data validation, Excel, and database concepts. Detail-oriented and eager to build a career in Master Data Management by ensuring data accuracy, consistency, and quality.

PROJECTS

Movie Discovery & Favorites Web Application

- Developed a movie discovery web application using React and React Router, enabling users to browse and search movies through a responsive interface.
- Integrated The Movie Database (TMDb) REST API to fetch popular movies and perform real-time movie searches using asynchronous API requests.
- Implemented global state management with React Context API, allowing users to add, remove, and manage favorite movies across the application.
- Utilized Local Storage for persistent data storage, ensuring users' favorite movie selections remain available across browser sessions.

E-Commerce Shopping Cart Application

- Developed a responsive E-Commerce Shopping Cart application using React, Redux Toolkit, and React Router.
- Implemented global state management with Redux Toolkit, including product fetching, cart operations, quantity updates, and total price calculation.
- Integrated REST API data from Fake Store API using createAsyncThunk and Axios for asynchronous product loading and error handling.
- Built key e-commerce features such as product search, add-to-cart, remove-from-cart, quantity management, and dynamic cart total updates.

EDUCATION

B.Tech, CSE

Graphic Era University, Dehradun • 2026 • 6.87

Class XII

DAV Centenary Public School • 2019

Class X

Aurum The Global School • 2017

SKILLS

JavaScript, HTML, CSS, React, Git,

GitHub
